SUMMARY

Software engineer with 3+ years of commercial product development experience. Strong background in performance optimization, memory management, and development of large production codebases. Seeking to apply systems thinking to enterprise-scale software.

CORE SKILLS

- **Programming:** .NET, C#, React, Angular, Vuejs, SQL (Oracle SQL, MySQL, SQLite), Python
- **Areas:** Backend, Frontend, Data Engineering, Data Analysis, AI
- **Tools:** Git, Perforce, Docker, Postman, Azure, Claude code, AI Agents
- **Languages:** English: C1 | Polish: Native

PROFESSIONAL EXPERIENCE

The Knights of U - Software Engineer (C#) | October 2022 - October 2025

Worked as a C# software engineer focusing on performance, stability, and tooling in large production codebases. Owned investigation and resolution of complex runtime, memory, and performance issues across multiple shipped products.

Key Achievements

- *Hollow Knight: Silksong* | Eliminated all stability hindrances in long-running processes by identifying and eliminating unmanaged memory leaks resulting in the stable runtime from 30 minutes to indefinite.
- *Internal Tooling* | Reduced GC pressure and memory fragmentation, resulting in smoother execution and fewer runtime stalls in memory-constrained environments.

PROJECTS

Portfolio | C#, ASP.NET, React, Azure, Docker, OpenSource

github.com/beam1ng/portfolio

Personal portfolio — projects, technologies, skills, summary. DB-driven content with an authenticated admin panel.

Room Reverb Simulation | C#, Math, Research paper

github.com/beam1ng/TransportPathPrecomputation

The aim of this project is to implement a technique for realtime reverb audio simulation proposed in the research paper "[Real-time Room Reverb in Large Scenes using Transport Path Precomputation](#)" by Gregor Mückl and Carsten Dachsbacher.

EDUCATION

Poznań University of Technology | October 2020 - February 2024

GPA 4.38 | Bachelor of Arts in Computer Science

LANGUAGES

English: C1 | Polish: Native
